Core Positioning

Store support, product research, listing optimization, data cleanup, reporting, and operational assistance for growing Shopify businesses.

What I Help With

Product uploads, category setup, title/description formatting, image optimization support, spreadsheet management, inventory review, and channel monitoring

Why It Matters

Clean product data and organized operations help store owners save time, reduce errors, improve listing quality, and make better growth-focused decisions.

Detail-oriented eCommerce VA for Shopify workflows

I am an eCommerce Virtual Assistant with a strong focus on Shopify store support, product research, listing optimization, and operational assistance. With a BSc and MSc in Statistics, I bring a detail-oriented and analytical approach to eCommerce workflows, helping stores improve product organization, research accuracy, and growth-focused decisions.

I also have supporting familiarity with Amazon, eBay, TikTok Shop, Shopee, and Lazada ecosystems. My statistics background helps me understand data trends, reporting language, and data-driven decisions with more confidence.

Built for store owners who need clean execution, not guesswork.

How I support a Shopify store

A clear, repeatable process for improving product data, dashboard visibility, and operational consistency.

- 01 Review** Check product status, inventory, categories, channels, and order/marketing signals.
- 02 Clean** Fix or organize product information, tags, collections, variants, and spreadsheet records.
- 03 Optimize** Improve titles, descriptions, SEO structure, and listing readability where needed.
- 04 Report** Prepare clear notes on issues, trends, and next actions for the store owner.

Best-fit tasks

Product uploads · product research · data cleanup · inventory organization · SEO-friendly listing support · order status monitoring

Products Management

Experience reviewing product lists, inventory visibility, product status, categories, vendors, catalogs, product types, and sales channels inside Shopify.

What I review

- I. Product list structure
- II. Inventory status and gaps
- III. Category and vendor organization
- IV. Product type and channel review
- V. Collection/tagging readiness

Marketing & Attribution Review

Experience reviewing traffic sources, sessions, sales attributed to marketing, order attribution, conversion signals, and channel-level performance in Shopify Marketing.

What I observe

- Traffic source observation
- Channel performance review
- Sessions, sales, and order attribution
- Basic performance insight preparation
- Marketing activity status

Marketing dashboard view: traffic sources, attribution, sessions, sales, and conversion signals

Shopify Store Operations Support – Sample Dashboard Review

In this sample workflow, I reviewed Shopify dashboard areas including Products, Orders, and Marketing. The focus was on understanding product organization, order status, fulfillment flow, traffic channels, and basic marketing attribution. This type of review helps store owners identify product data issues, inventory gaps, order handling status, and marketing performance signals.

Key Areas Reviewed

Key Areas Reviewed

- Product status and inventory condition
- Order payment and fulfillment status
- Delivery tracking visibility
- Marketing channel sessions and conversion signals
- Product categorization and vendor information

Value I Provide

Value I Provide

- Organized product data
- Cleaner listings
- Better store workflow visibility
- Research-backed product decisions
- Support for day-to-day eCommerce operations

Outcome focus: make the store easier to manage, easier to audit, and easier to grow.

Let's keep your Shopify store organized, updated, and ready for growth.

I combine eCommerce support skills with an analytical mindset. My Statistics background helps me work with product data, reports, pricing observations, and research tasks more carefully.
